# Jihwan Kwak

E-mail: kkwakzii@gmail.com

## EDUCATION

**Seoul National University** Sep 2021 – Present
M.S./Ph.D. Integrated Program in Electrical and Computer Engineering (Advisor: Prof. Taesup Moon)
Overall GPA: 3.87 / 4.3

**Sungkyunkwan University** Mar 2015 – Feb 2021
B.S. in Electrical Engineering
Overall GPA: 4.27 / 4.5

## RESEARCH INTERESTS

Core theme: **adaptation**. How models adapt to new data and new context, efficiently.
• Past: Continual learning (class-incremental classification and segmentation) [3, 4, 6]
• Present: Inference efficiency for adaptation (KV cache compression for long-context inference) [1]
• Current: Test-time training (TTT) for long-context models

## WORK EXPERIENCE

**Research Engineer**, NAVER, Vision-Language Team Oct 2025 – Mar 2026
- Throughput (TPS) acceleration for multimodal pretraining (Megatron-LM / Megatron-Bridge, NeMo 2)

**Visiting Student Researcher**, Stanford University (Prof. Tsachy Weissman) Jan 2025 – Feb 2025
- Work on BPEByte [2]

**Undergraduate Research Intern**, M.IN.D Lab, Seoul National University Jan 2020 – Aug 2021

## AWARDS AND HONORS

• KAIA Outstanding Paper Award (CKAIA 2026) 2026
• Best TA Award (C++ Programming), Seoul National University 2022
• Dean’s List and Scholarship, Sungkyunkwan University 2018, 2019, 2020
• First Mover Award and Scholarship, Sungkyunkwan University 2019, 2020
• SKKU President’s List 2019

## EXTRACURRICULAR ACTIVITIES

• KATUSA, 19th Expeditionary Sustainment Command, U.S. Army Oct 2016 – Jul 2018
• Supervisor / Interpreter, PyeongChang 2018 Olympic & Paralympic Winter Games Jan 2018 – Mar 2018
• Vice President, Academic Exchange, Young Engineers Honor Society (YEHS) Jan 2020 – Dec 2020

## TECHNICAL SKILLS

**Languages:** Python, C++, Verilog/VHDL
**Machine Learning:** PyTorch, vLLM, Megatron-LM, NeMo, scikit-learn, NumPy, pandas, Matplotlib
